MEMORANDUM

RE: General Electric – West Burlington  
510 East Agency Road  
West Burlington, Iowa 52655  
EPA ID No. IAD005272703

FROM: *Cynthia L. Hutchison*  
Cynthia L. Hutchison, RCAP

TO: Lynn Slugantz, Chief  
AWMD/RCAP

The General Electric – West Burlington facility generated and managed F001 - 1,1,1 trichloroethane degreaser; F003 - spent paint solvents; F006 - WWTP sludge; and D008 - paint sludge. A RCRA Facility Assessment (RFA) was conducted by Metcalf and Eddy, Inc. (M&E). The visual site inspection was conducted on August 21, 1990. Tank #7 held post cyanide treatment and chrome reduction rinse waters from plating bath. The underground tanks were removed by Laidlaw for GE in 1991. Toluene samples of the area were well below screening levels. I recommend the former Underground Process Tank Area be sampled, for chrome and cyanide to determine if it has been adequately remediated, or if residual contamination remains.
